`jakub@chrpa:/$` about me

I've been programming since I was 14 and in the meantime it's turned into a passion.

Right now I work as a full-time developer, but I'm open to work on part-time projects.

`jakub@chrpa:/$` experience

OKsystem

jakub@chrpa:/\$ projects

Bydliček

2022

A webpage scraper mostly intended for personal use.
Its main purpose was scraping real estate websites for new listings.
I managed to find a very nice flat thanks to it.

Tones of Decay website

2023 - present

<https://tonesofdecay.com>

A website for Tones of Decay, a death metal festival.

Tones of Decay order system

2025 - present

Services that look for new ticket orders, save them and send email
confirmations for them with scannable QR codes.

BCP Service Status

2024

A service written in GO that periodically measures latency to all servers
and gives out the results on an endpoint.

Shoptet Descriptions

2024

A CLI app that generates descriptions for products from a csv file through
AI. Written in GO.

Sherdog API

2024

A service that parses a given fighter's / event's page on Sherdog and
returns the data in a machine readable format (as a JSON).
Uses Redis as a cache to avoid Sherdog's vicious rate limiting.
